

## Introduction to Logic Programming – WS 2023 Solutions for Exercise Sheet 3

## 1 Exercises

## Exercise 2 (Simplification of Propositional Formulae)

Simplify the following two propositional formulae by rewriting implications to disjunctions and moving negations inwards to the literals.

1. 
$$(a \Rightarrow (b \land \neg a)) \Rightarrow b$$

$$\equiv (\neg a \lor (b \land \neg a)) \Rightarrow b$$

$$\equiv \neg (\neg a \lor (b \land \neg a)) \lor b$$

$$\equiv (a \land \neg (b \land \neg a)) \lor b$$

$$\equiv (a \land (\neg b \lor a)) \lor b \text{ (task completed)}$$

$$\equiv (a \land \neg b) \lor (a \land a) \lor b$$

$$\equiv (a \land \neg b) \lor a \lor b$$

$$\equiv ((a \lor a) \land (\neg b \lor a)) \lor b$$

$$\equiv (a \land (\neg b \lor a)) \lor b$$

$$\equiv (a \lor b) \land (\neg b \lor a \lor b)$$

$$\equiv (a \lor b) \land (\neg b \lor a \lor b)$$

$$\equiv (a \lor b) \land (\neg b \lor a) \text{ (task completed)}$$

$$\equiv ((\neg a \land \neg b) \land (b \lor a) \text{ (task completed)}$$

$$\equiv ((\neg a \land \neg b) \land (b \lor a) \text{ (task completed)}$$

$$\equiv ((\neg a \land (b \lor a)) \land (\neg b \land (b \lor a))$$

$$\equiv ((\neg a \land b) \lor (\neg a \land a)) \land (\neg b \land (b \lor a))$$

$$\equiv (\neg a \land b) \land (\neg b \land (b \lor a))$$

$$\equiv (\neg a \land b) \land (\neg b \land (b \lor a))$$

$$\equiv (\neg a \land b) \land (\neg b \land (a \land \neg b))$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\equiv (\neg a \land b) \land (\neg b \land a)$$

$$\Rightarrow (\neg a \land b) \land (\neg b \land a)$$

$$\Rightarrow (\neg a \land b) \land (\neg b \land a)$$

$$\Rightarrow (\neg a \land b) \land (\neg b \land a)$$
